 Faculty of Science and Technology (FST)
 Department of Computer Science (CS)

Course Title: CSC1205: Object Oriented Programming 1 (JAVA)

Lab Task 5: Developing a basic Java program with Inheritance.

Look at the following class diagram and class notations carefully, and develop the program.

Class Diagram

Food
String name String ingredients [] double price float calories
Food() Food (String name, String[] ingredients, double price, float calories) void setName(String name) void setIngredients (String[] ingredients) void setPrice(double price) void setCalories (float calories) String getName () String[] getIngredients () double getPrice () float getCalories () void removeIngredient(String ingredient) void addingredient(String ingredient) abstract void showDetails()

Drinks

String Type
int **sizeInLitter**

Drinks()
Drinks (String name, String[] ingredients, double price, float calories, String type, int **sizeInLitter**)

void setType (String type)
void setSize(int **sizeInLitter**)

String getType ()
int getSize ()

Burger

int numberOfPatty

Burger()
Burger(String name, String[] ingredients, double price, float calories, int numberOfPatty)

void setNumberOfPatty (int numberOfPatty)
int getNumberOfPatty ()

void showDetails ()

Pizza

int **sizeInInches**

Pizza()
Pizza(String name, String[] ingredients, double price, float calories, int **sizeInInches**)

void setSize (int **sizeInInches**)
int getSize ()

void showDetails ()

Start

The **start** class contains the main method. Inside the main method, create two objects of **Drinks**, **Burger** and **Pizza**. Demonstrate all the methods and constructors.
